

*Thank you for your purchase of an Elite Screens edge frame projection screen.*

### Hardware and Parts List

Please make sure all parts listed below are included before installation.

<p><b>A. Elbow joint x4 pcs</b></p> 	<p><b>B. Top/Bottom horizontal frame x4 pcs</b></p> 	<p><b>C. Left/Right vertical frame x2 pcs</b></p> 
<p><b>D. Center joints x2 pcs</b></p> 	<p><b>E. Center Support bar x1-2 pcs</b></p>  <p>(135"-150" x 2 pcs)</p>	<p><b>F. Wall brackets x2-3 pcs</b></p> 
<p><b>G. M5x15 screw x24 pcs</b></p> 	<p><b>H. M5x50 screws and anchor x6 pcs</b></p> 	<p><b>I. Rubber hammer x1 pc</b></p> 
<p><b>J. Screwdriver x1 pc</b></p> 	<p><b>K. Black Tape x1 bag</b></p> 	<p><b>L. Bezel trim x6 pcs</b></p> 
<p><b>M. Corner sleeve x4 pcs</b></p> 		

## Frame Assembly

1. Insert the center joint into one of the  $\frac{1}{2}$  *horizontal frames (B)* and fasten it with the two *M5x15 screws (G)*.
2. Insert the other  $\frac{1}{2}$  horizontal frame piece to the center joint and fasten also using two *M5x15 screws*.
3. Repeat steps 1 and 2 for assembling the second horizontal frame.

4. Insert the *elbow joint (A)* into each end of the *horizontal frames (B)* as shown below.

5. Insert the two *vertical short frames (C)* into the *elbow joint (A)*.

6. Join the remaining *horizontal long frame (B)* with the frame built in the previous steps as shown below.

7. Make sure all four corners are properly in place to form a perfect square. Then fasten the four angles with the **M5x15 Screws (G)**.

### Screen Material Installation

1. Lay the **screen material** completely flat with the front facing down on a clean surface in a horizontal position. The back side of the screen material should be placed upwards.

**Note:** *The back side of the material has the velcro borders all around the edges.*

2. Carefully and gently place the assembled frame on top the screen material as shown below. Make sure to not allow the angle edge of the frame to come in direct contact with the screen material to avoid puncturing it.

Screen material corner

Screen material back facing up

3. After all of the corners of the frame have been properly aligned, attach the material to the frame in the following order A→B→C→D (see instructions below for details).

Attach the screen material to the corners as shown below.

1) Stretch the screen material in the direction of the arrowhead.

2) Fold over and attach material to the velcro strip of the frame.

3) Fold over second side and attach to frame

4) Repeat until all four sides are done in the order A, B, C, D

4. After all four corners have been attached; please check whether the frame corners are wrapped by the screen material. If not, please loosen the velcro connection and repeat the above steps so the frame is not exposed.

**Note:**  
Represents the screen material

**Note:** The black shaded part represents the velcro on the frame. That Velcro end will ultimately attach with the other velcro end on the screen material.

5. Proceed to attach the rest of the material to the frame as described in the illustrations below.

Lay the Velcro end on the screen material over the Velcro end of the frame and keep it within the edge.

Proceed in the following sequence below ① → ②

The key is to attach within the middle sections of 1 and 2. Then continue attaching the remaining unattached areas.

Repeat the same steps on remaining three sides in the sequence A, B, C, and then D as show below.

6. If the material is too loose or tight after adjusting all four corner sides, then you will need to reattach the material.

*Please follow the steps below to properly remove the screen material from the frame. This procedure will ensure prolonging the life of the screen material.*

### Screen Material Removal

1. Detach the velcro from the frame.
2. Gently pull back the material to release it from the velcro connections on the corners

Pull back the screen material from the velcro connection along the edges of the frame to detach it.

### Support bar installation (for models under 135"):

1. Position the *center support bar (E)* in the middle of the frame and align the hole on each end of the support bar with the *M6 hex screws* on the top and bottom frames. Then fasten with the *M6x12 screws*.

## Support bar installation (for models 135"- 150"):

1. Position the *center support bar (E)* and *M6 hex screws* in the areas of the frame shown in fig 1. (Each about one thirds the way in from the end of the frame.) Align the hole on each end of the support bar with the *M6 hex screws* located at the top and bottom frame sections. Then fasten with the *M6x12 screws*.

## **Notice to Installer:**

Please use the following installation instructions to obtain superior optical performance from the Angular Reflective ALR (Ambient Light Rejecting) Screen.

Make sure to follow these instructions in order for the DayWalker screen fabric to perform correctly.

- Angular-Reflective material is not compatible with ultra/short-throw projectors
- Minimum lens throw ratio 1.5x image width
- Ambient light must not come from the same direction as the projector

*Since angular-reflective means that the projected image will reflect at the mirror-opposite angle, it is important to position the projector so that the viewer will get the best possible image.*

**Step 1:** Establish the general “eye level” of the viewers

**Step 2:** Set the appropriate projection level

**Step 3:** Adjust the screen height level and projection angle

**Input Angle (A) = Output Angle (B) aligns with the viewer's angle**

### Correct Installation Examples

**Projector Ceiling Installation:** Make sure the projector (*light in*) is angled (A) to reflect (B) at the mirror-opposite angle (*light out*) to align with the viewer's eye level.

PROJECTOR CEILING INSTALLATION

**Projector Table Top:** Make sure the projector (*light in*) is angled (A) to reflect (B) at the mirror-opposite angle (*light out*) to align with the viewer's eye level.

PROJECTOR TABLE TOP INSTALLATION

### Incorrect Installation Examples

**Ceiling Mounted Short-throw Projector**

CLOSE UP CEILING PROJECTOR ILLUSTRATION (NOT COMPATIBLE)

**Tabletop Ultra-Short throw Projector**

ULTRA SHORT THROW PROJECTOR ILLUSTRATION (NOT COMPATIBLE)

**Note:** Improper installation will result in light loss and produce a dark image. This is due to the projector's light reflecting in the wrong direction.

*Images are not up to scale and are for illustration purposes only.*

### Edge trim Installation

Included is an ultra-thin black edge trim that provides an elegant bezel finish

1. Place the assembled frame on a flat and clean surface. The projection screen surface should be facing up.
  - a. As an option, Black Tape is supplied to cover any possible gaps between the pieces of the bezel trim. Align the tape with the edge of the screen, as shown in Figure 1. Once properly aligned, apply the black tape to the center of the top and bottom of the screen material.

Figure 1

2. Without removing the adhesive tape, place all the trim pieces along the edge of screen material. Adjust the trim so that the top and bottom trim pieces are touching and show no gaps in the center. (Note: The Elite logo should be positioned on the bottom right). Refer to Figure 2 below for a visual reference.

**NOTE:** Make sure the bottom edge trim with the Elite Screens logo is installed on the correct side. The back of the material should be labeled with a *DOWN* sticker to indicate the material is facing in the down position. The Elite Screens logo should be installed on the *DOWN* side

- After properly aligning all trim pieces, carefully remove trim piece **A** (see Figure 3 below). Remove the inside backing of the tape and place the trim piece in its original position on the frame. Repeat this step for the remaining trim pieces in the following order: B-C-D-E-F.

The **front side** of the frame with trim pieces attached.

Corner gap will be covered by the **corner sleeve (N)**.

- After the bezel trim has been installed, place a **corner sleeve (M)** on all four corners. Begin by aligning and adjusting the corner sleeve through the front of the screen. Make sure the corner sleeve completely wraps the edge of the bezel trim. This should cover any corner gaps.

Once all corner sleeves have been snapped into each corner of the frame, it is ready to be installed.

### Diagonal Size Note:

The Diagonal Size of the 100" & 120" models before and after installing the edge trim strip. 101" comparison

Before installing the trim strip

After installing the trim strip

120" comparison

Before installing the trim strip

After installing the trim strip

### **Installation**

Locate your desired installation location with a stud finder (recommended) and mark the drill-hole area of where the screen is to be installed.

1. Drill a hole with the proper bit size according to the wood screws included.
2. Line up the wall brackets with the drilled holes on the installation location and screw them in using a Phillips screwdriver.
3. Position the frame screen onto the *wall brackets (F)* as shown in **below**.
4. The design of the wall brackets allows the frame to slide over them through its sides. This is an important feature of the installation design as it allows your screen to be properly centered.
